Art Unit: 3627

## SUPPLEMENTAL EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Examiner discussed the following amendments on January 5, 2004 with Updeep Gill (reg. # 37334) who approved of them. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 90, line 21 the words "the content" have been replaced with the word -- content--.

In claim 99, line 4 the first occurrence of the word "said" has been replaced with the word --a--.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims in this case is the inclusion of the claimed limitations of a graphical user interface that enables a user of the tool to create diagrams of a financial scenario conceived by the user on a screen where the interface enables the creation of a financial scenario diagram by allowing the user to define parties in the financial scenario, add them to the display in the form of graphical party objects, define financial instruments in the financial scenario, add them to the display in the form of graphical financial objects which show a physical connection on the diagram between pairs of the graphical party objects in the diagram, and indicate

Application/Control Number: 09/530,040

Art Unit: 3627

flow directions on the diagram between pairs of the graphical party objects for an obligation related to the financial instrument connecting the pairs; where a software engine creates a mathematical model for the financial scenario using data collected by the engine during the creation of the diagram which includes creating variables and mathematical relationships between variables based on content of the diagram; where the diagram and the model are linked with the tool and the user interface enables the user to make changes to the objects in the diagram which corresponding changes are made by the engine to the mathematical model; and where the user interface enables the user to perform an analysis of the financial scenario using the created mathematical model by changing values for the created variables within the mathematical model and viewing a result determined by the mathematical model which are included in all the independent claims and which is not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

US Patent 5572644, inventor Liaw et al., discloses a financial scenario modeling and analysis tool, but does not disclose a tool enabling a user to create a diagram of a financial scenario conceived by the user on a screen along with creating a mathematical model where the creation of the model includes creating variables and mathematical relationships between variables based on the content of the diagram.

Art Unit: 3627

WO 97/38383, inventor Rohde, discloses a tool for determining financial instruments to fund a loan, but does not disclose the claimed tool enabling a user to create a diagram of a financial scenario conceived by the user on a screen along with creating a mathematical model where the creation of the model includes creating variables and mathematical relationships between variables based on the content of the diagram.

21<sup>st</sup> Century; Money, Banking and Commerce, author Vartanian, discloses the practice of diagramming financial relationships, but does not disclose the claimed tool enabling a user to create a diagram of a financial scenario conceived by the user on a screen along with creating a mathematical model where the creation of the model includes creating variables and mathematical relationships between variables based on the content of the diagram.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elaine Gort whose telephone number is 703/308-6391. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on 703/305-3597. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
